INSTITUTIONS

The main Institutions dealing with water sector:

The [EMWIS](#) is the Focal Point Information System on the know-how in the Water sector.

A number of governmental and non-governmental organisations have direct and indirect interest in the development and conservation of water resources in Turkey. Institutional framework has three levels; namely, decision making, executive and users level. In decision making level prime ministry, state planning organisation and ministries take place. Governmental organisations under the ministries are at the executive level.

There are both governmental and non-governmental organisations at the water users level for the operation and maintenance of the projects. The four main organisations responsible for development of water resources are General Directorate of State Hydraulic Works (DSİ), General Directorate of Rural Services (GDRS), General Directorate of Bank of Provinces (İller Bankı), and General Directorate of Electric Power Resources Survey and Development Administration (EİE).

- [General Directorate of State Hydraulic Works \(DSİ\)](#)
- [General Directorate of Rural Service \(GDRS\)](#)
- [General Directorate of Bank of Provinces \(İller Bankı\)](#)
- [General Directorate of Electric Power Resources Survey and Development Administration \(EİE\)](#)

The Turkish focal point is the [General Directorate of State Hydraulic Works \(DSİ\)](#)

Training

With the Countries' social and economic development, the problems related to water resources and the environment are increasing. The water sector and, more generally, the one related to the natural resources safeguard, require a continuous updating for everyone involved. In Italy there are several firms and institutes dedicated to training. These entities can be divided into two categories:

Institute

University

Training: Algeria
